Hacker-Proof Passwords

How to create an almost hacker-proof password to keep your device and information secure.

1. Write 1-2 sentences that you can easily remember. Try to include a number, and be sure to use correct capitalization and punctuation.
2. Copy the first letter of each word and also any numbers and punctuation.

Examples

Beginner-Level
1. My 2 favorite movies are Frozen and the Lego Movie.
2. **M2fmaFatLM.**   (7,000 years to crack according to https://HowSecureIsMyPassword.net/)

Super-Spy-Level
1. My sister and I go to bed at 9:30 every night.
2. My sister & I go 2 bed @ 9:30 every night.   (add an extra step by changing some of the words first)
3. **Ms&Ig2b@9:30en.**   (4 trillion years to crack)

Exercises

#1 Create a password from this sentence.

1. On May 19, I will be 10 years old!

2. _____

#2 Write your own sentence(s) and convert it to a password.

1. _____

2. _____

Remember...

```
1. A great password has at least
     2 uppercase letters:              ABCDEFGHIJKLMNOPQRSTUVWXYZ
   + 2 lowercase letters:              abcdefghijklmnopqrstuvwxyz
   + 2 numbers:                        0123456789
   + 2 punctuations or symbols:        #.$&!,?-+
   = 8 or more keystrokes/characters
2. Never share your password.
3. Don't save your password on a computer or device.
4. Only write your password on paper.
5. Keep your password paper somewhere secret and safe.
6. Try to use many different passwords especially for super-secret stuff.
```
